PROFESSIONAL SUMMARY

2+ years building production React/Next.js applications across 4 companies. Built SaaSify — a multi-tenant SaaS billing system with Stripe webhooks, subscription lifecycle management, and owner analytics dashboard.

EDUCATION

Bachelor of Science (Computer Science) 2018 - 2022
Art's, Commerce and Science College, Amravati Grade: 75.18%

EXPERIENCE

Frontend Engineer Intern February 2025 - February 2026
Dexy AI Remote

- Led migration of data-fetching layer from native fetch to TanStack Query across the main dashboard, improving caching behaviour and eliminating redundant API calls
- Built end-to-end authentication system for admin dashboard — signup flow, user type restrictions, refresh token bug fix, and auth context refactor
- Developed Create Agent and Playground feature — a core product surface allowing users to create and test AI agents in real time
- Shipped features end-to-end across campaign management, ICP workflows, and prospect management used by customers

React Developer April 2024 - February 2025
TheMoonDevs Remote

- Developed and maintained full-stack features using Next.js, TypeScript, and Prisma ORM in a production codebase with real users
- Built RESTful API integrations with structured error handling, loading states, and retry logic for reliability Delivered pixel-perfect responsive UI components tested across Chrome, Firefox, and Safari

React.js Developer Trainee June 2023 - November 2023
CTO-Ninja Remote

- Built 5+ responsive React.js applications from scratch using JavaScript, HTML, CSS, and Material-UI component library
- Translated Figma designs into production-ready React components with cross-browser compatibility

Software Development Intern December 2022 - April 2023
Techmates Remote

- Developed reusable UI components using React.js, TypeScript, and Blueprint.js for an enterprise-grade application
- Collaborated with senior developers in an Agile environment, participating in code reviews and sprint planning

PROJECTS

SaaSify — Multi-tenant SaaS Billing Dashboard (Github) (Demo) March 2026

- Tech Stack: Next.js 15, TypeScript, Tailwind CSS, Prisma, MongoDB, NextAuth.js, Stripe, TanStack Query, Recharts, Resend
- Integrated Stripe Checkout with idempotent webhook handling — prevents duplicate subscriptions when Stripe retries failed deliveries
- Built complete subscription lifecycle: upgrade with prorated billing, downgrade, cancel with period-end access, and reactivate
- Owner analytics dashboard with MRR/ARR, 12-month revenue charts, churn rate, and server-side paginated customer search
- Webhook logs page showing every Stripe event with expandable JSON payload — built for production debugging

HireFlow — Full Stack Hiring Portal (Github) (Demo) January 2026

- Tech Stack: Next.js 15, TypeScript, Tailwind CSS, Prisma, MongoDB, NextAuth.js, Redux Toolkit, TanStack Query, Pusher, Resend
- Built hiring platform with role-based access control for Admin, Recruiter, and Job Seeker
- Implemented real-time messaging using WebSockets with optimistic updates
- Designed scalable architecture using reusable hooks, reducing component complexity by ~40%

SKILLS

Languages: JavaScript, TypeScript
Frameworks & Libraries: React, Next.js, Tailwind CSS, Redux Toolkit, TanStack Query, Prisma ORM
Tools & Platforms: Git, GitHub, Postman, Figma, Vercel
Other: REST APIs, WebSockets, Stripe Integration, NextAuth.js, UI/UX, MongoDB
